Subject Index

Alumina
microstructural study of plasma-sprayed alumina and Ni Cr coatings, 103
Aluminium
corrosion inhibition of Al alloys in heat exchanger systems, 365
study of the corrosion of Al: model for the initiation of pitting, 243
Anodic oxidation
the positive plate of a lead–acid battery I: analysis of the composition during chemical preparation and its anodic oxidation, 253
Anodization
titanium anodization under constant voltage conditions, 381
Antimony
electron spectroscopic studies on films of SnO_2 and SnO_2:Sb, 77
Auger
Auger and LEED controlled deposition of Mn monolayers on the W(110) surface, 297

Boehmitized aluminium
surface charge and interaction with sulphate ions at the boehmitized Al, 351

Cadmium
Cd and Pb underpotential effects on Cu–Ni alloys, 235
Capillary
capillary criterion to determine the epitaxial potency of a system, 335
Carbon
the effect of S and C inclusions on the corrosion resistance of electrodeposited Ni–Fe alloy coatings, 137
Cavitation wear
cavitation wear of electroless Ni in distilled water and 3% NaCl water, 213
Chromium
comparative corrosion tests of multilayer Ni–Cr coatings, 127
microstructural study of plasma-sprayed alumina and Ni Cr coatings, 103
Cobalt
thermal oxidation of Co ion implantation studies, 11
Copper
Cd and Pb underpotential effects on Cu–Ni alloys, 235
Cu electrocrystallization on a heterogeneous Ag(111) substrate, 55
inorganic compounds in electroless Cu deposition, 223
the surface layer pH in the electroless Cu plating process, 45
Corrosion
acid corrosion of steel in water–dimethylformamide solutions, 89
comparative corrosion tests of multilayer Ni–Cr coatings, 127
corrosion inhibition of Al alloys in heat exchanger systems, 365
study of the corrosion of Al: model for the initiation of pitting, 243
Crack formation
investigation of the influence of pulse parameters on crack formation in Pd electrodeposits, 151

Deposition
Auger and LEED controlled deposition of Mn monolayers on the W(110) surface, 297
Dimethylformamide
acid corrosion of steel in water–dimethylformamide solutions, 89
electrodeposition of Ni from *N,N*-dimethylformamide, 343
Dropping mercury electrode
catalytic reduction of In(III) at the dropping Hg electrode in 1 M NaN_3 medium and the activation energies of its electrochemical processes, 63

Electrocrystallization
Cu electrocrystallization on a heterogeneous Ag(111) substrate, 55

© Elsevier Sequoia/Printed in The Netherlands

Electrodeposition
electrodeposition of Ni from *N,N*-dimethylformamide, 343
investigation of the influence of pulse parameters on crack formation in Pd electrodeposits, 151
preparation and characterization of electrodeposited amorphous Ni–P alloys, 31
property enhancement of Ni electrodeposits by anodic current pulses, 143
the effect of S anc C inclusions on the corrosion resistance of electrodeposited Ni–Fe alloy coatings, 137
the effect of the periodically changing current on the electrodeposition of Ni–Fe alloys, 325
Electroless deposition
inorganic compounds in electroless Cu deposition, 223
Electroless nickel
cavitation wear of electroless Ni in distilled water and 3% NaCl water, 213
Electroless plating
investigations of $SnCl_2$-sensitizing solutions for electroless plating, 203
the surface layer pH in the electroless Cu plating process, 45
Electron spectroscopy
electron spectroscopic studies on films of SnO_2 and SnO_2:Sb, 77
Epitaxy
capillary criterion to determine the epitaxial potency of a system, 335

Hastelloy X
some aspects of the plasma-sprayed thermal barrier coating on Hastelloy X, 289
Heat exchanger systems
corrosion inhibition of Al alloys in heat exchanger systems, 365
HVEM
HVEM study of structural defects in recessed oxide isoplanar technology, 319
Hydride
hydride formation during the cathodic polarization of Ti in artificial sea water, 401

Inclusions
the effect of S and C inclusions on the corrosion resistance of electrodeposited Ni–Fe alloy coatings, 137
Indium
catalytic reduction of In(III) at the dropping Hg electrode in 1 M NaN_3 medium and the activation energies of its electrochemical processes, 63
Ion implantation
thermal oxidation of Co ion implantation studies, 11
Iron
the effect of S and C inclusions on the corrosion resistance of electrodeposited Ni–Fe alloy coatings, 137
the effect of the periodically changing current on the electrodeposition of Ni–Fe alloys, 325

Kinetics
kinetics of the passivation of Mo in salt solutions as inferred from impedance and potential measurements, 117

Lead
Cd and Pb underpotential effects on Cu–Ni alloys, 235
Lead–acid battery
the positive plate of a lead–acid battery I: analysis of the composition during chemical preparation and its anodic oxidation, 253
LEED
Auger and LEED controlled deposition of Mn monolayers on the W(110) surface, 297

Manganese
Auger and LEED controlled deposition of Mn monolayers on the W(110) surface, 297
Molybdenum
kinetics of the passivation of Mo in salt solutions as inferred from impedance and potential measurements, 117

Nickel
Cd and Pb underpotential effects on Cu–Ni alloys, 235
comparative corrosion tests of multilayer Ni–Cr coatings, 127
electrodeposition of Ni from *N,N*-dimethylformamide, 343

microstructural study of plasma-sprayed alumina and Ni Cr coatings, 103
preparation and characterization of electrodeposited amorphous Ni–P alloys, 31
properties of non-aqueous solutions of $Ni(CF_3SO_3)_2$, 163
property enhancement of Ni electrodeposits by anodic current pulses, 143
the effect of S and C inclusions on the corrosion resistance of electrodeposited Ni–Fe alloy coatings, 137
the effect of the periodically changing current on the electrodeposition of Ni–Fe alloys, 325
Non-aqueous solutions
properties of non-aqueous solutions of $Ni(CF_3SO_3)_2$, 163
properties of non-aqueous solutions of $Zn(CF_3SO_3)_2$, 173

Palladium
investigation of the influence of pulse parameters on crack formation in Pd electrodeposits, 151
Particle size distribution
the importance of particle size distribution on the plasma spraying of TiC, 1
Passivation
kinetics of the passivation of Mo in salt solutions as inferred from impedance and potential measurements, 117
pH
the surface layer pH in the electroless Cu plating process, 45
Phosphorus
preparation and characterization of electrodeposited amorphous Ni–P alloys, 31
Pitting
study of the corrosion of Al: model for the initiation of pitting, 243
Plasma deposition
Technical Note: cathodic arc plasma deposition processes and their applications, a review, 303
Plasma spraying
microstructural study of plasma-sprayed alumina and Ni Cr coatings, 103
some aspects of the plasma-sprayed thermal barrier coating on Hastelloy X, 289
the importance of particle size distribution on the plasma spraying of TiC, 1
Polarization
hydride formation during the cathodic polarization of Ti in artificial sea water, 401
Positive plates
the positive plate of a lead–acid battery I: analysis of the composition during chemical preparation and its anodic oxidation, 253
Pulse parameters
investigation of the influence of pulse parameters on crack formation in Pd electrodeposits, 151
Pyrophoric iron sulphide
the formation of pyrophoric FeS from rust, 183

Quantum electrodynamics
electrochemical treatment of metal–vacuum–metal systems: the concept of vacuum as a solvent in terms of quantum electrodynamics, 199

Recessed oxide isoplanar technology
HVEM study of structural defects in recessed oxide isoplanar technology, 319
Reduction
catalytic reduction of In(III) at the dropping Hg electrode in 1 M NaN_3 medium and the activation energies of its electrochemical processes, 63
Rust
the formation of pyrophoric FeS from rust, 183

Sea water
hydride formation during the cathodic polarization of Ti in artificial sea water, 401
Sensitization
investigations of $SnCl_2$-sensitizing solutions for electroless plating, 203
Silver
Cu electrocrystallization on a heterogeneous Ag(111) substrate, 55

Slot-type field-shaping cell
slot-type field-shaping cell: theory, experiment and application, 409
Steel
acid corrosion of steel in water–dimethylformamide solutions, 89
the inhibition of steel corrosion in aqueous solutions containing oxygen, 389
Structural defects
HVEM study of structural defects in recessed oxide isoplanar technology, 319
Sulphate ions
surface charge and interaction with sulphate ions at the boehmitized Al, 351
Sulphur
the effect of S and C inclusions on the corrosion resistance of electrodeposited Ni–Fe alloy coatings, 137

Thermal barrier coating
some aspects of the plasma-sprayed thermal barrier coating on Hastelloy X, 289
Thermal oxidation
thermal oxidation of Co ion implantation studies, 11
Tin oxide
electron spectroscopic studies on films of SnO_2 and SnO_2:Sb, 77
Titanium
hydride formation during the cathodic polarization of Ti in artificial sea water, 401
the importance of particle size distribution on the plasma spraying of TiC, 1
titanium anodization under constant voltage conditions, 381
Tungsten
Auger and LEED controlled deposition of Mn monolayers on the W(110) surface, 297

Underpotential effects
Cd and Pb underpotential effects on Cu–Ni alloys, 235

Vacuum
electrochemical treatment of metal–vacuum–metal systems: the concept of vacuum as a solvent in terms of quantum electrodynamics, 199

Zinc
properties of non-aqueous solutions of $Zn(CF_3SO_3)_2$, 173
